Contact page				✓	
Reflections (description of portfolio pieces)					
Content of reflections appropriate					✓
Project images are high quality			✓		

Spelling and grammar are correct					✓

What was your overall first impression of the website?

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

I did not have any technical difficulties navigating through the pages on the website.

What do you feel are the most effective design elements of this web portfolio?

I feel that the most effective design elements of the web portfolio are the icons on the home page, it makes the home page look a bit more modern.

What would you suggest be changed with the design or content of this web portfolio?

One of the things that I would suggest to change would be to fix the breakpoints of the images on all of the webpages. The images don't resize according to the page size and it makes everything look squished.
